

NB Distressed Debt Investment Fund Limited – Ordinary Shares (“NBDD”)

NBDD FUND OBJECTIVE

NB Distressed Debt Investment Fund Limited’s (“NBDDIF”) primary objective is to provide investors with attractive risk-adjusted returns through long-biased, opportunistic stressed, distressed and special situation credit-related investments while seeking to limit downside risk.

NBDDIF’s holdings are diversified across distressed, stressed and special situations investments, with a focus on senior debt backed by hard assets. The portfolio is managed by the Distressed Debt team at Neuberger Berman, which sits within what we believe is one of the largest and most experienced non-investment grade credit teams in the industry.

On 10 June 2013, the investment period of the NBDD Share Class (“NBDD”) expired and the assets of NBDDIF attributable to the Ordinary Shares were placed into the harvest period. \$132.8 million (equivalent to 107% of original capital) has been distributed (income by way of dividend and capital by way of redemption) to shareholders since the realisation phase for this share class began.

The Ordinary Share Class is one of three classes of shares in NBDDIF. The others are the Extended Life Share Class and the New Global Share Class, which both offered exposure to new opportunities in this asset class beyond 10 June 2013. The Extended Life Share Class was subject to an investment period which ended on 31 March 2015 and the New Global Share Class was subject to an investment period which ended on 31 March 2017. Separate factsheets are produced for those share classes.

MANAGER COMMENTARY

In the fourth quarter of 2024, investors continued to focus on stabilising inflation, slightly weaker economic growth figures and the elections in the United States. Looking ahead, investors will continue to monitor multiple trends including global growth, the ultimate destination of rates, and geopolitical events. All could lead to elevated volatility over the next 12 months and beyond. Given these circumstances, the timing and quantum of any financial impact on the portfolio remain difficult to predict. Despite the uncertainty, the investment manager remains committed to realising the investments in an orderly manner and winding down the share class as soon as practicable. We have two investments which we believe may have material upside. However, the timing of any upside remains uncertain and, as we continue to seek liquidity, we will weigh the benefit of the timing of returning cash to investors relative to realising any additional upside.

For regulatory reasons, the final 10% of the total return (NAV plus cumulative distributions) in respect of any class of participating shares in NBDDIF will be returned to shareholders with a final compulsory redemption of all the outstanding shares of that class. As such, there will be no further distribution for NBDD until the final distribution to investors and the wind-down of the share class. The investment manager is evaluating options to wind down NBDD and will keep investors informed as there is more clarity.

While uncertainty in markets remains, we have reviewed the remaining investments to provide guidance on their realisable values. The investment manager uses economic, industry and issuer-specific data to estimate the gross realisable value in downside, base case and upside scenarios for each investment in the portfolio. It currently estimates that the range of the aggregated realisable value for the investments in the portfolio is between 80% and 123% of the quarter-end market values of these investments, with a base case of 112%. Shareholders should, however, note that: (i) the realisable values of the investments are calculated on a gross basis and, in particular, do not reflect any applicable third-party expenses; and (ii) this range of aggregate realisable values is an estimate only, with no guarantee that the value actually realised will be within this range. Further details on the risks relating to "forward looking information" are set out at the end of this announcement.

Portfolio Update

NBDD ended the quarter with a NAV per share of \$0.78 compared with \$0.77 at the end of last quarter. The NAV increased 1.1% during the quarter. At quarter-end, 48% of NBDD's NAV was invested in distressed assets with 52% held in cash including U.S Treasury securities. Cash will build as assets are realised.

The portfolio consists of 3 issuers across 2 sectors, which are containers & packaging and surface transport. The ratio of distributions, both income and capital, to original capital, is 107%. Including the current NAV, the figure rises to 116%.

Distributions

As explained above, due to regulatory reasons, the final 10% of the total return (NAV plus cumulative distributions) in respect of any class of participating shares in NBDDIF will be returned to shareholders with a final compulsory redemption of all of the outstanding shares of that class. It is intended that the next distribution for NBDD will be the final distribution to shareholders and will wind down the share class. The investment manager has undertaken a review of all the investments in the light of a changed market. The table below provides an overview of the status of each of the remaining holdings in the portfolio.

We will continue to update shareholders as we gain further clarity on investment realisations.
